WELCOME TO KINFIT

The app that pays you digital currency for your daily steps

USE THE REAL-TIME PODEMETER THAT IS ALREADY ON YOUR PHONE

Your phone stands ready to help you earn with a built-in pedometer that already records every step you take.

The **KinFit** app is a fully integrated platform that connects your phone's pedometer to the Kin Ecosystem. This allows users to earn Kin cryptocurrency and to enjoy a wide range of spending options for the Kin they earn. Gift cards from many major retailers are already available, and other opportunities to spend your Kin in exciting and unique ways are in the works.

You can also move your Kin to other apps and wallets... after all, the Kin you earn in **KinFit** belongs to YOU. It is yours to keep, or to use, forever. Kin cryptocurrency is a form of money, and you can spend it however you wish.

Plans are also underway to exchange your Kin for your local currency (US Dollars, Euros, Japanese Yen, etc)

Download **KinFit** today and see what it can do for you!

THE KIN ECOSYSTEM OF APPS IS GROWING!

KinFit is the app you will want to use every single day! If you walk anywhere at all, you can use **KinFit** to reward yourself.

KinFit integrates seamlessly with other apps in the Kin Ecosystem, all interconnected by the Kin Blockchain, and paid out by the Kin Rewards Engine. Kin has been used in millions of transactions, but is just getting started.

At **KinFit**, we couldn't be more excited by the opportunity to help people change their lives and encourage them to be more active, and therefore more healthy. And the best part is that we pay them to do it. It's not a joke, it's very, very real. Your actions have value... and we are here to help you unlock that value.

This goes against everything we've all been taught... but it's the new reality.

The reality of the **KinFit**, and of the KIN ECOSYSTEM.
